

Public Announcement:

FREE for public use: A new, independent, disaster tolerant wireless messaging network.

Details:

There is no FCC license requirement to transmit on this network. Personal transceivers are inexpensive and work together with a Bluetooth phone App. The general public is invited to test, explore and use the network. Everyone is welcome.

If you are interested? Ready to host one of these maintenance free solar powered units?

Who are we?

Bandon AuxCom is a small group of Ham Radio nerds seeking to place tiny antennas in locations across the city of Bandon. We are testing disaster tolerant messaging technology for public use during emergencies.
